The Personalized Medicine Coalition, representing innovators, scientists, patients, providers and payers, promotes the understanding and adoption of personalized medicine concepts, services and products to benefit patients and the health system.
PARADIGM SHIFTS, ESPECIALLY IN MEDICINE, DO NOT HAPPEN JUST BECAUSE THE SCIENCE OR NEW TECHNOLOGIES SUGGEST THEY SHOULD.

Based on that assumption, some 20 institutions representing different sectors of the health care system launched the Personalized Medicine Coalition in 2004 to develop a new medical paradigm that links treatment decisions to diagnostics.

Believing in an ecosystem of shared value across multiple stakeholders, the Coalition advocates for changes that will increase investment in personalized medicine and facilitate its clinical adoption so that both patients and health systems will benefit from improved health care and increased efficiency.

WHAT IS PERSONALIZED MEDICINE?

Personalized medicine is an evolving field in which physicians use diagnostic tests to determine which medical treatments will work best for each patient. By combining the data from those tests with an individual’s medical history, circumstances and values, health care providers can develop targeted treatment and prevention plans.
PMC WORKS TO ENSURE THAT POLICIES AND PRACTICES IN THE PUBLIC AND PRIVATE SECTORS PAVE THE WAY FOR PERSONALIZED MEDICINE.

Based in Washington, D.C., PMC works closely with health systems, lawmakers and agency officials to advance strategic priorities in three areas:

- **Education:** To raise the profile and scope of personalized medicine, PMC proactively educates decision-makers about how the field can make the health system more effective and efficient by targeting treatments to only those patients who will benefit.

- **Advocacy:** To help facilitate the development of personalized medicine tests and therapies, PMC engages regulators and other policymakers to advocate for continued investments in biomedical research as well as modernized regulatory, coverage and payment policies that support access to personalized medicine.

- **Evidence Development:** To encourage the swifter adoption of personalized medicine by health care providers, PMC helps build the evidence base necessary to demonstrate the clinical and economic value of personalized medicine.

“Personalized medicine is transforming the practice of medicine, and PMC is playing a critical role in bringing together all of the stakeholders to help make that happen.”

— Raju Kucherlapati, Ph.D., Paul C. Cabot Professor of Genetics, Harvard Medical School
PMC MEMBERS ARE LEADING THE MOVEMENT TOWARD PERSONALIZED MEDICINE TO BENEFIT PATIENTS AND HEALTH SYSTEMS AROUND THE WORLD.

MEMBER COMMITTEES/WORKING GROUPS

- **PMC's Public Policy Committee** helps shape emerging legislative, regulatory and reimbursement policies in the public sector.
- **PMC’s Patient Advocacy Organization Working Group** assesses the extent to which emerging policy developments will inhibit or encourage personalized, patient-centered health care.
- **PMC’s Pharma and Diagnostics Working Group** assesses the extent to which emerging policy developments will inhibit or encourage the development of personalized medicine products and services.
- **PMC’s Science Policy Committee** helps inform the medical practices of health care providers and the reimbursement policies of commercial payers.
- **PMC’s Health Care Working Group** develops best practices for health care providers delivering personalized medicine.

MEMBER BENEFITS

- **CONTACT**
  2,000+ leaders in personalized medicine via PMC’s member database

- **INTERACT WITH**
  200+ thought leaders from Congress, FDA, CMS and the private sector at member meetings and events

- **SAVE**
  40% on registration for the Annual Personalized Medicine Conference
PMC MEMBERSHIP

PMC is an international, multi-stakeholder 501(c)3 nonprofit organization with members that are committed to science-driven, evidence-based health care.
