**Resolution for Increased Funding of Biomedical Research at the
National Institutes of Health for FY 2017 and FY 2018**

Whereas consistent and sufficient funding of biomedical research provides a foundation for innovation in personalized medicine, thereby reducing the burden of disease and improving the lives of millions of Americans (such as the National Institutes of Health's *All of Us*SM Research Program— a public effort to build a national, large-scale research enterprise with one million or more volunteers to extend personalized medicine to all diseases); and

Whereas only consistent and sufficient funding for the National Institutes of Health will lead to breakthroughs for personalized medicine;

The Personalized Medicine Coalition commends Congress on:

- the passage of a FY2017 spending bill that includes the funding outlined in the 21st Century Cures Act for the National Institutes of Health (NIH),
- increasing funding for the National Institutes of Health by \$2 billion, that is in addition to the funding outlined in the 21st Century Cures Act, and

The Personalized Medicine Coalition calls on Congress:

- to increase FY2018 NIH funding by an additional \$2 billion above the FY2017 level, that is in addition to the funding outlined in the 21st Century Cures Act.

BOARD OF DIRECTORS

President

Edward Abrahams, Ph.D.

Chair

Stephen L. Eck, M.D., Ph.D.
Aravive Biologics

Vice Chair

Jay G. Wohlgenuth, M.D.
Quest Diagnostics

Treasurer

Peter Maag, Ph.D.
CareDx

Secretary

Amy P. Abernethy, M.D., Ph.D.
